

WASHINGTON VERTical

PACIFIC NORTHWEST **CLEAN ENERGY INNOVATION HUB**

Industry-Led Clean Energy Coalition

We are solving national supply chain challenges in the nuclear and other advanced clean energy sectors using three primary strategies:

- 1) Establish the first U.S.-based industry-led supply chain alliance to solve industry-wide challenges and meet emergent needs.
- 2) Deploy innovative clean energy technologies to provide integrated energy solutions.
- 3) Ensure the readiness of the next-generation industry workforce to create a pipeline of talent.

Our efforts will provide scalable resources that communities throughout the U.S. can deploy – especially communities most severely impacted by the closing of carbon-emitting energy generation facilities.

Washington VERTical's solutions will enhance national energy security by increasing domestic production and manufacturing.

PACIFIC NORTHWEST **CLEAN ENERGY INNOVATION HUB**

Our Goals

VERTical 2030

- Deploy world-class supply chain model

VERTical 2025

- Support suppliers of small modular reactor construction (start 2024)
- Leverage membership expansion across Washington
- Ready the next-generation industry workforce

VERTical 2022

- Data/supplier portal
- Expand communications and collaboration
- Policy, regulation, finance and recruitment
- Conduct domestic and international marketing analysis
- Form the Clean Energy Supplier Alliance
- Hold a supplier forum
